Spring of 1901.

A Summary of All the Most Desirable Novelties,

As well as the best among older tested varieties of

Trees, Shrubs, Evergreens, Rhododendrons,
Hardy Herbaceous Perennials and Fruits,

Grown and offered by the

SHADY HILL NURSERY CO.,

102 State Street, Boston, Mass.

We grow as Large and Varied a Stock as any American Nursery. Nurseries located at Bedford, Mass., where we have nearly three hundred acres under cultivation.

 *Our General Catalogue of 166 pages, a valuable handbook, sent on application.*

U. S. Department of Agriculture

If You Plant This Spring,

this summary of the best in **Trees, Shrubs, etc.**, will prove of value. Our large general catalogue will be mailed to you if you desire it, and it will please us to have you send for it.

Our stock of **Trees, Shrubs, Roses, Evergreens, Herbaceous Plants, Vines, Rhododendrons, Azaleas, Fruit Trees, and Small Fruits** was never larger or in finer condition, and we are prepared to offer the lowest prices for any list of trees or plants required, and hope to hear from you this season.

There are few novelties this season of real merit. The best things are those which have been well tested and are not new. As we grow many trees, shrubs, etc., in large blocks, and can often give customers the benefit of our immense surplus of certain varieties, buyers will find it a great advantage to send to us for an estimate upon any list required before placing orders. We can unquestionably save you a liberal percentage on any order.

We guarantee our stock to be absolutely free of San Jose Scale. Our nurseries are carefully inspected twice a year, and we have erected a Fumigating House, in which all stock likely to be infected by injurious insects will be treated with hydrocyanic acid gas, in conformity with the recommendations of leading entomologists.

We are convinced that no nursery in the country has adopted more stringent precautions than ourselves against the introduction of Scale insects

THE HERBACEOUS GARDEN.

The above represents a charming garden border of Hardy Perennials planted and arranged by us. We make a feature of designing old-fashioned gardens and will offer plans and suggestions for the same to any of our correspondents.

Novelties in Trees.

Bechtel's Flowering Crab. (*Pyrus Angustifolia*.)

Of all dwarf flowering trees this is preeminently beautiful, and, were we confined to one tree, this would be our choice. It blossoms freely when but 2 or 3 feet high, a habit not common to most of the *Pyrus* family, and the flowers are produced after the full development of the leaves.

The individual flowers are very large, vivid pink in color, with intermingling of white, and are intensely fragrant. For a single specimen of low, compact growth there is nothing to excel it. Strong trees, 75 cents.

The Paragon Chestnut.

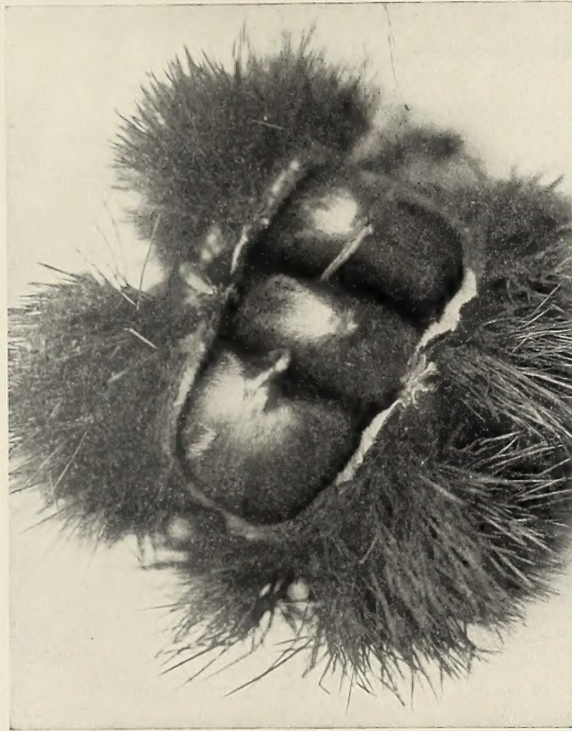

Our cut on following page shows the immense nuts of this remarkable variety, which is not only a beautiful ornamental tree, but one of profit. The nuts are produced on young trees when but 7 feet high, and they are double the size of the ordinary American chestnut. The tree is hardy and vigorous and the fruit of the best quality. On account of its dwarf and ornamental habit it is well adapted to planting in small grounds. \$1.00.

Syringa Japonica. (Japan Tree Lilac.)

This beautiful tree is found growing only in one small neighborhood in the most northern island of Japan. It makes a straight, stout, well-branched tree, in shape like a young ash tree, with leaves so large and handsome that it would be in demand as a grand lawn tree for its foliage alone; but when it puts forth, in mid-summer, when other lilacs have long been gone; its

BECHTEL'S FLOWERING CRAB.

PARAGON CHESTNUT AND BURR. (See Page 4.)

immense clusters of white blossoms, standing stiffly up on the outer and top shoots of the tree, sometimes measuring 16 by 24 inches in size, it is then, without a doubt, the most showy of all our ornamental

trees. The common lilacs mildew the last half of the summer, but this almost anomalous new species is always clean and glossy, and seems to be perfectly at home in our climate.

The first ever grown, commercially, were grown in Shady Hill Nurseries, in 1885, and have been sent since then all over the world. 3-4 ft., 50 cents; 5-7 ft., 75 cents.

A Few New Trees of Value are:

Betula Alba Aurea.

A yellow-leaved birch, fine for contrasts with other birches. \$1.00.

Acanthopanax Ricinifolium.

A new Aralia-like tree with immense leaves like the castor-oil bean plant. Hardy and sub-tropical in effect. \$1.00.

Populus Trichocarpa.

A fine new variety of the balsam poplar, with long oval leaves, silvery beneath, and strong in growth. 75 cents.

Ulmus Umbraculifera.

This has a distinct globular growth, becoming finer with age and most picturesque. \$1.00.

Crataegus Carrieri.

One of the finest of the thorns. The foliage is deep, glossy green; the flowers large and white in color. The tree is loaded with bright scarlet fruit the size of a cherry. Most effective and valuable. 75 cents.

Salisburia.

(Maiden-hair Tree or Ginkgo.)

About as handsome a small tree as can be cultivated. It is from Japan, and grows into columnar form to about 40 feet. The foliage is formed like the Adiantum fern, thick and glossy. It is largely used abroad for street planting, and as an individual specimen is always handsome. Very desirable on small grounds. 75 cents to \$1.50.

Juglans Sieboldii.

An entirely hardy form of Japan walnut, closely resembling the English walnut, with fruit freely produced in clusters. The foliage is handsome, and the tree makes a picturesque specimen. 50 cents.

Liriodendron Tulipifera Variegata. (Variegated Tulip Tree.)

The variegation of this fine tree is most distinct, each leaf having a brilliant golden margin. The general growth and habit of the tree is stately and symmetrical. The leaves do not burn and fade, as so often with other variegated trees. \$1.50 each.

Fagus Sylvatica Purpurea Rosea Marginata.

A very brilliant rose, margined-leaved variety of the purple beech. The colors are vivid, and the tree is most effective when in full leaf. It does best in partially shady positions. \$1.50.

Leading Shade and Ornamental Trees.

The following list comprises the most desirable.

New Shrubs.

The Dwarf-Flowering Philadelphus. (Avalanche.)

The old fashioned tall growing syringa, so called, is one of the best of shrubs, but in its place we have this low-growing form with weeping branches, so well shown in the accompanying cut. It is quite a fountain of flowers. We regard it of greater value than most any other recently introduced shrub. The flowers are pure white and fragrant, and nothing could be more graceful or effective.

It is yet scarce and the stock limited. 75 cents.

Philadelphus Candelabre.

Another very dwarf form, producing large and graceful blossoms which entirely cover the branches. A charming variety. 50 cents.

Philadelphus Lemoinei Erectus.

Forming an erect bush; the branches are entirely covered with little flowers of the purest white and very fragrant. 50 cents.

Philadelphus Lemoinei.

("Sheaf of Snow.")

Enormous flowers of the purest white, sweet-scented; the branches are arched and drooped by the weight and quantity of flowers. 50 cents.

THE DWARF-FLOWERING PHILADELPHUS (P. Avalanche).

Philadelphus Lemoinei. ("Mont Blanc.")

Attaining 5 ft. high; erect branches, entirely covered with large, fragrant flowers. 50 cents.

Deutzia Parviflora.

An elegant new shrub, from China. Strong, compact habit, and in June covered

with large corymbs of creamy white flowers. 50 cents.

Sambucus Nigra Flore Roseaplena.

Very vigorous shrub, with double-rose flowers; awarded a silver medal at the Antwerp Exhibition. 60 cents.

DEUTZIA LEMOINEI.

Viburnum Dilatatum.

This is considered one of the finest of the group. The foliage is dark green and the shrub dense in habit. It is covered in the fall with masses of brilliant orange-red berries. 75 cents.

Weigelia Eva Rathke.

One of the best of the weigelias, the plant having a vigorous habit and bearing freely well-shaped, large, crimson-red flowers. 50 cents.

Deutzia Lemoinei. (See cut.)

This hardy deutzia is one of the most important among new introductions. The flowers are nearly two-thirds longer than the well-known *D. gracilis*. The large, open flowers are borne in pyramidal heads, are pure white in color, and cover the plant densely. This deutzia has attracted attention wherever shown. 50 cents.

Ceanothus Gloire de Plantieres.

A blue-flowering shrub is a rarity. This is about the only one of the family of *Ceanothus* which can be called hardy, and we can especially recommend it for sections south of Boston. We doubt its hardiness very far north of Boston. The lavender-blue flowers are borne in large terminal clusters, which are graceful and feathery and highly ornamental. 40 cents.

Sambucus Tenuifolia.

A new, hardy variety, with foliage so deeply cut that it resembles some of the Japan maples. It forms a shrub of elegant aspect, and we think it will prove of great value. 75 cents.

Deutzia Gracilis Rosea.

A splendid rosy form of the well-known *D. gracilis*. Of strong, erect, branching habit; very free flowering, and in every way valuable for out-of-door growth or forcing. 35 cents.

Deutzia Gracilis Venusta.

A handsome dwarf variety, with long pyramidal panicles of pure white flowers, the individual flowers resembling an azalea in miniature. 35 cents.

HARDY SHRUBS.

These we grow in enormous quantities, few, if any, nurseries equaling our stock. Of the popular Japan berberis thunbergia, the best hedge plant ever introduced, we can offer over fifty thousand plants, and all other stock in proportionate quantity. Viburnums, hydrangeas, Japan quince, privet, weigelas, deutzias, lilacs, spireas, and all other varieties can be supplied by the hundred or thousand, at prices which hardly admit of competition. We can quote by the hundred, for strong shrubs, prices ranging from \$8.00 to \$15.00 per hundred, according to variety.

Shrub Collections at Low Prices.

The collections we offer as follows are made up of the choicest and best of flowering and fruiting shrubs with those of colored or variegated foliage. All are large, thrifty specimens.

6 Shrubs—6 Varieties for \$1.25, as follows:

- | | |
|----------------------|---------------------|
| 1 Barberry, purple, | 1 Deutzia gracilis, |
| 1 Elæagnus longipes, | 1 Forsythia, |
| 1 Lilac villosa, | 1 Purple fringe. |

12 Shrubs—12 Varieties for \$2.25, as follows:

- 1 Barberry, purple-leaved,
- 1 Deutzia gracilis (dwarf),
- 1 Spirea Van Houtte,
- 1 Forsythia (Golden Bell),
- 1 Japan quince, scarlet,
- 1 Lilac villosa (Japanese),
- 1 Cornus, red-branched,
- 1 Deutzia, Pride of Rochester,
- 1 Euonymus, red-fruited,
- 1 Honeysuckle shrub, pink-flowering,
- 1 Purple fringe (Smoke Tree),
- 1 Purple-leaved plum (Prunus pissardi).

25 Shrubs—25 Varieties for \$5.00.

(Our selection of varieties.)

50 Shrubs—50 Varieties for \$7.50.

(Our selection of varieties.)

100 Shrubs—50 Varieties for \$10.00.

(Our selection of varieties.)

Rhododendrons and Evergreen Plants.

Our list of these is made up of only the absolutely hardy varieties which have been tested in New England winters. To grow these only is the secret of success. Special lists will be sent on request, with full cultural instructions.

Best named varieties (see large catalogue for list of varieties) — (entirely hardy); about 18–24 ins. high, good bushy plants, well set, with buds. Usually sold at \$1.50 each. \$11.00 per dozen; \$80.00 per hundred; \$1.00 each.

Best named varieties (entirely hardy); 2–2½ ft., good plants. \$15.00 per dozen; \$105.00 per hundred; \$1.50 each.

R. Maximum.

This, our native rhododendron, is the hardiest of the family. It is also a vigorous grower, and it comes into bloom long after the hybrid varieties. It is easily transplanted, and is perhaps the most valuable of the broad-leaved evergreen plants. It produces great masses of pinkish white flowers in late June and early July. We can supply extra fine plants, very bushy, for immediate effect from 50 cents to \$1.00 each; 24–30 ins., extra bushy, \$50.00 per hundred.

R. Catawbiense.

A fine native with large trusses of beautiful pinkish white flowers, and absolutely hardy. Strong plants, 75 cents each; \$8.00 per dozen; \$60.00 per hundred. 12–18 ins., 35 cents per hundred.

Kalmia Latifolia.

Our beautiful mountain laurel. Extra fine plants, 18–20 ins., bushy. \$1.00 each; \$9.00 per dozen.

Andromeda Floribunda.

One of the most exquisite of evergreen shrubs. Hardy. \$1.00 each; \$10.00 per dozen.

JAPAN SNOWBALL (*Viburnum plicatum*.)
Grown in Tree Shape.

HARDY AZALEAS.

Without exception, these are the most showy of flowering shrubs. The *Ghent* and *Mollis* forms are most brilliant, with innumerable shades of yellow, orange, red, scarlet, soft pinks, and white. See large catalogue for names and varieties.

Azalea Mollis Sinensis.

A new hybrid class, quite distinct, and a valuable improvement, the flowers being larger than *Azalea mollis* and finer in color. They cannot be recommended too highly. \$1.00 each.

Alma Tadema. Soft, creamy rose.

Charles Darwin. Orange-red.

Dr. Reitenbach. Salmon.

Hortulanus. Golden yellow.

Madame A. Koster. Apple blossom.

Rosy. Soft pink.

Azalea Occidentalis.

A splendid hardy form with creamy white flowers, which are *highly fragrant*. A distinct and valuable variety. \$1.00.

Ghent Azaleas.

Strong plants, named kinds, \$1.00 each; \$10.00 per dozen; \$70.00 per hundred.

Mollis, or Japan Azaleas.

Strong plants, named kinds, 75 cents each; \$8.00 per dozen; \$60.00 per hundred.

Seedlings of these fine, strong plants, unnamed, \$2.75 per dozen; \$20.00 per hundred.

SHRUBS IN STANDARD FORM.

As individual specimens, shrubs in standard or tree form are often sought for, and in formal gardening or upon the lawn are most effective, the standard strain displaying the broad-spreading head of foliage and blossom in striking contrast with the surrounding vegetation.

Althæa.

Finest double varieties as follows: *Amaranthus*, *Bicolor*, *Comte des Flandres*, *Carnea pleno*, *Duchesse de Brabant*, *Elegantissima*, *Ranunculæflora*, *Violet Clair*, and *Buist's* variegated; two-year heads, 3-4 ft. stems, 75 cents.

Deutzia.

Candidissima, 3-4 ft. stems, 50 cents.

Exochorda.

Grandiflora, 3-5 ft. stems, 75 cents.

Forsythia.

Fortunii, 3-4 ft. stems, 50 cents.

Hydrangea.

Paniculata grandiflora, 2 ft. stems, very strong heads, ready for immediate blooming, 75 cents.

Philadelphus.

Nepalensis and *Sanguinea*, 3-4 ft. stems, 50 cents.

Privet.

California, 3-4 ft. stems, 75 cents.

Spiraea.

Opulifolia, 3-4 ft. stems, 40 cents.

Styrax.

Japonica, 2-4½ ft. stems, 80 cents.

Viburnum.

Plicatum, 75 cents.

Wistaria.

Sinensis, 3-4 ft. stems, 80 cents.

Japanese Maples.

These low-growing, shrub-like trees are general favorites, on account of their dense, compact, and withal graceful growth, and their brilliant foliage, which retains its color during most of the summer. *Acer palmatum aureum* has intense yellow foliage and is reliably hardy. This with *Atropurpureum* and its form with dissected foliage are the hardiest of the many varieties catalogued. We have found all the other varieties liable to be winter-killed in New England.

Acer Polymorphum Sanguineum (Blood-leaved Japan Maple), 12-18 ins. 75 cents each; \$7.50 per dozen.

Acer Polymorphum Sanguineum (Blood-leaved Japan Maple), 18-24 ins. \$1.00 each; \$10.00 per dozen.

Acer Polymorphum Sanguineum (Blood-leaved Japan Maple), 2-2½ ft. \$1.50 each; \$15.00 per dozen.

Acer Dissectum Atropurpureum (Purple Cut-leaved Japan Maple), 18-24 ins. \$1.50.

Acer Dissectum (Green Cut-leaved Japan Maple), 2-2½ ft. \$1.50 each; \$20.00 per dozen.

Acer Japonicum Aureum (Golden Japan Maple), 18-24 ins. \$1.50 each; \$20.00 per dozen.

HARDY ROSES.

We grow and sell nearly thirty thousand of these popular plants each year. We offer only strong, two-year-old bushes, which, with proper planting and care, will blossom this year.

See our large catalogue for general list of new and old varieties and cultural directions.

Hybrid Perpetuals.

Including all of the finest and best-known varieties. Extra strong two-year plants, \$3.00 per dozen; \$20.00 per hundred.

Tea Roses.

Including the best and choicest varieties. See large catalogue for list of varieties. \$2.50 per dozen; \$15.00 per hundred.

Polyantha Roses.

The finest and hardiest of bedders in variety. \$3.00 per dozen; \$18.00 per hundred.

Moss roses in variety. \$3.00 per dozen; \$18.00 per hundred.

Rosa rugosa and alba. \$3.00 per dozen; \$18.00 per hundred.

Lord Penzance Hybrid Sweetbrier Roses.

These lovely hybrid forms have already become very popular. The foliage has all the fragrance of the sweetbrier, while the single flowers are brilliant in various shades of

crimson, rose, copper, white, ecru, etc. Strong plants, 30 cents each; \$3.00 per dozen.

Amy Robsart. Lovely deep rose.

Anne of Gierstein. Dark crimson.

Brenda. Peach blossom.

Flora McIvor. Pure white and blush.

Lady Penzance. Beautiful soft tint of copper.

Lord Penzance. Soft shade of fawn.

Lucy Ashton. Pretty white blooms with pink edges.

Meg Merrilies. Gorgeous crimson.

Rose Bradwardine. Clear rose.

Crimson Rambler Rose.

Each year confirms the great value of this hardy, brilliant climber. Vigorous in habit, its long growths loaded with clusters of vivid crimson flowers are unsurpassed in effect. It is one rose among a thousand for good, all-around qualities. Strong plants, 25 cents each; \$2.50 per dozen; extra strong, 40 cents each.

Yellow Rambler Rose.

Similar in habit to Crimson Rambler, with bright yellow flowers in large trusses. The flowers are highly scented. A very valuable new rose. 25 and 40 cents.

Among other new single roses the following are most desirable:

Pink and White Rambler, 25 cents.

Rosa Setigera, 25 cents.

Paul's Carmine Pillar, 50 cents. No picture can well show the beauty of this wonderfully brilliant single rose.

True garden lovers would not be without this variety for tenfold its price if they could properly appreciate its value as a garden rose. It is far more effective in color than Crimson Rambler, and much more refined in every way. The plant is a very strong grower.

Rosa Wichuraiana and Hybrids.

(R. Wichuraiana.)

This most distinct and hardy rose has been found to be one of the most useful roses, from its being essentially unique in its manner of growth and in its general appearance. Its habit of growth is one of its most remarkable features, as the shoots are prostrate in habit, and extend from 10 to 15 feet in a single season, covering the ground densely. The leaves are dark green and lustrous. The effect of this foliage, forming a close mat over the ground, is greatly enhanced by the flowers, which appear about the middle of July, and are irregularly borne during the remainder of the season. These are pure white, nearly 2 inches across, and are very fragrant, being formed in broad pyramidal clusters, and in most cases a large number of flowers being produced in one cluster. The stamens are a bright yellow. 20 cents each; \$2.00 per dozen; \$15.00 per hundred.

WICHURAIANA HYBRIDS.

Manda's Triumph.

Of free growth, with fine foliage, and clusters of from twelve to eighteen perfectly formed double white flowers, nearly 2 inches across, beautifully imbricated; a valuable sort. It is also very sweet scented.

Universal Favorite.

A free grower, producing long, branching shoots, with bright, shiny foliage in abundance, and soft, light pink double flowers, 2 inches in diameter, strongly perfumed.

South Orange Perfection.

This is a gem, with free growth close to the ground and multitudes of the most perfectly formed double white flowers, soft blush pink at the tips, changing to white.

Pink Roamer.

A hybrid which shows the sweetbrier characteristics in bloom, while the growth, which is very rampant, partakes more of the Wichuraiana. The single flowers, which are produced in close heads, are nearly 2 inches in diameter, bright, rich pink, with almost a white center, which lightens up the orange-red stamens, producing an effect which, combined with the fragrance, makes it one of the most valuable roses in cultivation.

30 cents each; \$3.00 per dozen.

MANDA'S LATEST HYBRIDS.

Evergreen Gem.

Not only evergreen, but growing during mild weather in winter. Stems long, branching, rich bronze color, covering the ground closely. Foliage fine rich bronze color, closely matted. Flowers produced singly on stems, yellow, buff in bud, opening to almost white, 2 or 3 inches in diameter, perfectly double, with delightful sweetbrier fragrance. 30 cents.

Jersey Beauty.

Extremely vigorous grower; foliage glossy and of thick, leathery substance. Flowers large, single, 3 inches in diameter, opening pale yellow with cluster of bright yellow stamens, very fragrant, and produced in greatest profusion, covering the plant entirely, and having the appearance of a yellow Cherokee rose. The most striking variety of the set. 30 cents.

Gardenia.

Strong grower, with large green foliage; flowers produced singly on stems 6 inches to 1 foot long. When in bud hardly distinguishable from Perle; bright yellow, and, when open, cream color, and 3 to 3½ inches in diameter, incurving toward evening to perfect imitation of a gardenia as to shape and color; hence its name. Flowers are delightfully fragrant and produced freely. A grand rose for any purpose. 30 cents; per dozen, \$3.00.

New Climbing Moss Rose.

(Cumberland Belle.)

A fine climbing sport from the moss rose

Adelaide. It is a true moss rose, bright silvery rose in color, and attains a height of 10 to 15 feet in a season. A very valuable

and beautiful climber, especially as it is hardy and vigorous. 40 cents each; \$4.00 per dozen.

New Rambler Rose "Psyche."

This rose received an award of merit from the Royal Horticultural Society of England. It resembles in growth and habit the famous

SINGLE EVERGREEN ROSE, JERSEY BEAUTY.

EVERGREEN ROSE, GARDENIA.

Crimson Rambler, and its flowers, produced in immense quantity, are white, tinted with salmon rose and pink, with bright yellow at the base of the petals. It is a remarkable hybrid, invaluable to every rose lover, and will be generally liked when better known. Price, 35 cents.

New Rose, "Sweetheart."

An exquisite hybrid originated, by Mr. Walsh, from a cross between R. Wichuraiana and Bridesmaid. The flowers are very double, and about 2½ inches in diameter, white, with reverse of petals pink, making a perfect symphony of pink and white. The growth of the plant is from 6 to 9 feet each season, the habit prostrate, with leaves somewhat larger than Wichuraiana. For covering banks and rocks, or other situations where this trailing habit is necessary, this rose is unique. Sweetly scented. 75 cents each.

New Rose, "Debutante."

Another of Mr Walsh's hybrids, between Wichuraiana and Baroness Rothschild. It makes shoots 8 to 12 feet, with trailing habit. Flowers produced in clusters, color soft pink, deliciously scented. The leaves are dark and glossy, almost evergreen. Perfectly hardy in any situation. It produces flowers in September until frost. Awarded silver medal by the Massachusetts Horticultural Society. 75 cents each.

New Ever-Blooming Tea Roses.

Admiral Dewey.

Among the most beautiful of pink roses, a delicate daybreak blush, clear and distinct,

and very captivating; a sport from Madame Caroline Testout, more vigorous in habit, and a very free bloomer. Forces finely, and is very fragrant. Rose of enormous size. Two-year-old plants, 50 cents each.

Antoine Rivoire.

A handsome new rose of vigorous habit of growth, with large, full, camellia-shaped flowers. Color rosy flesh, on a yellow ground, shaded with a border of carmine; flowers 5 inches in diameter. A remarkable variety of great worth. Two-year-old plants, 50 cents each.

Balduin.

One of the most remarkable roses of recent date. As strong growing as the best of the hybrid perpetuals, with large, handsome foliage, flowers of the fullest form and largest size, which are equaled in profusion by no other rose of its size that we have seen. The color is a bright, glowing carmine. Two-year-old plants, 50 cents each.

Clara Barton.

Grand, new, constant blooming rose. The color is a rare and exquisite shade of delicate amber pink, entirely different from any other rose. Flowers medium size, double to the center, delightfully fragrant, and each one is set in with a lovely rosette of leaves completely encircling the flower, and making a bouquet of itself. A constant bloomer. Two-year-old plants, 50 cents each.

(Climbing Paul Neyron.

(Madame Wagram.)

Paul Neyron has always been known as the largest rose extant. In climbing Paul Ney-

ron we have this large size, coupled with its bright, fresh pink color, that no rose excels. And it is also a true perpetual bloomer. The freest of all the climbers. This rose is a wonder. Two-year-old plants, 50 cents each.

Coronet.

The sweetest, largest, and freest blooming hybrid tea rose in cultivation. Coronet is a true, ever-blooming hybrid tea, identical in size with Paul Neyron. From the time the plant is 4 inches high it blooms steadily, bearing in unbroken continuity, on good, stiff stems, magnificent large flowers that frequently measure from 4 to 6 inches in diameter. The form is full, deep, and wonderfully double. In the bud the color is a deep, rich carmine, which, as the flowers open, lightens to a soft, clear pink, with each petal distinctly edged with silvery gray. The effect is beautiful. The fragrance is delicious. In the open ground, where it is hardy, it does splendidly, commencing early in the season and continuing until severe freezing weather. Slight protection during winter will be beneficial. Probably the most valuable and satisfactory rose for general cultivation sent out for many years. Two-year-old plants, 50 cents each.

Gruss an Teplitz.

As a bedding rose this is one of the finest and most useful varieties ever sent out. It will take rank with Hermosa or Souper. The color is brightest scarlet, shading to deep, rich, velvety crimson. It is very fragrant. The freest grower and the most profuse bloomer of any ever-bloomer. The mass of color produced is wonderful, and the foliage is extremely beautiful, all the younger growth being a bronzy plum color. It is a perfect

sheet of richest crimson scarlet all summer. Two-year-old plants, 50 cents each.

Mrs. Robert Peary.

(Or Climbing Kaiserin.)

Without doubt the grandest of all white climbing roses. Small plants bloom continually the first season. It is as hardy as any hybrid perpetual or moss rose, and will withstand, unprotected, the most severe winters. It is a strong, rapid grower. The flowers are of splendid substance, extra large, full, deep, and double, and are produced on long, stiff stems like a forcing or cut-flower rose. The buds are long and pointed, exquisitely modeled and fragrant. It has a fragrance that is delicious. Two-year-old plants, 50 cents each

Monthly Cabbage.

The old Cabbage Rose of our grandmothers' gardens. The Monthly Cabbage Rose is a continuous bloomer all through the summer. The color is bright pink, lovely both in bud and open flower, both being large and double to the center. The fragrance is a true damask scent. A grand rose. Two-year-old plants, 50 cents each.

Sunrise.

The most gorgeous rose of its class yet introduced. This has made a sensation in England and taken first honors wherever shown. In bud form it shows the high, brilliant colors seen only in the Austrian copper, scarlet, and yellow. As it opens the color deepens, the scarlet turning darker red, the yellow to orange and copper, the inside of the petals golden yellow. The open rose is

large, perfectly double, and of grand form. The foliage is glossy and thick, the new growths being the darkest and most beautiful found among roses. The form and color of

bud, its freedom of growth and bloom will give Sunrise a high place among forcing roses. 25 cents each; two-year-old plants, 60 cents each.

CHOICEST NEW HARDY ROSES.

The following are selected from among the finest new roses lately originated. All of them are very distinct and worthy of place in choice rose collections.

Bladud.

A very large globular flower; outside petals silvery white, center pale blush pink. Two-year plants, 75 cents.

Clio.

Large globe-shaped flowers, flesh color in the center with rich pink; vigorous and handsome foliage. One of the finest new roses. 50 cents.

Helen Keller.

Of most perfect form and highly fragrant. The large perfect flowers are brilliant rosy cerise in color. A very free bloomer and most distinct. 50 cents.

Ards Rover.

A splendid addition to the climbing and pillar roses. Most vigorous in habit, with handsome foliage, with extra large flowers of vivid crimson, shaded maroon color. A beautiful climbing variety. 50 cents.

Royal Scarlet.

This forms a vigorous bush, admirably suited for bedding. The single flowers are a

most vivid scarlet and leaves reddish brown in color. 75 cents.

Mavourneen.

Large full flowers, perfect shape. Color delicate silvery flesh white, shaded rose. A most lovely flower. 50 cents.

Rev. Alan Cheales.

Flowers extremely large, pure lake in color, with reflex silvery white petals. Most vigorous and free in habit. Two-year plants, 50 cents.

Tom Wood.

This is especially valuable, flowering freely from early summer until late in autumn. Color cherry red, petals of immense substance, and flowers large and perfectly formed. Habit vigorous and branching. 50 cents.

Killarney.

A charming rose of robust growth and free habit, flowering through the season. The blooms are large and buds long and pointed. Color flesh, shaded white, with pale pink suffusion. This variety has attracted considerable attention. Strong plants, 75 cents.

Purity.

A hybrid Bourbon rose, valuable as a garden rose and one for cut blooms. It makes a grand pillar rose. The flowers are pure

white with a faintly flushed center. It is both a free and early bloomer. 75 cents.

Other fine new roses described in our large catalogue are: Marchioness of Downshire,

beautiful satin pink; Marchioness of Londonderry, with magnificent ivory white flowers 7 inches across; Mrs. R. G. Sharman Crawford, immense rosy pink flowers of unique form.

New Hardy Herbaceous Plants.

Hemerocallis Aurantiaca Major. (See cut.)

This splendid perennial has been tested by us thoroughly, and we find it very hardy.

The flowers of this plant measure, when expanded fully, 6 to 8 inches across. They are trumpet shaped, and the ordinary description can hardly do justice to their beauty.

The main color is a brilliant orange-yellow, with a deeper band of color at the base of the flower. The habit of the plant is fairly dwarf, and the flowers are most abundantly produced.

We can safely recommend it to all plant lovers, and especially to those who are seeking good things for the hardy garden. 50 cents.

Anemone Queen Charlotte.

Last season we catalogued this new plant, but did not fully appreciate its value then. Last summer we found that it bloomed much earlier than the old varieties, that the flowers were not spoiled by early frosts, an evil quite common to the older varieties. It is also much hardier, and does not die out by winter-killing, while the flowers are beyond comparison with the type. They are fully 4 inches across, and of the most delightful shade of La France pink, lasting a long time when cut, as

they are of great substance. This plant will, in our judgment, be in great demand when well known. 25 cents; \$2.00 per dozen.

Campanula Persicifolia Moerheimi.

This peach-leaved Campanula is of German origin, and is the finest double white bell-flower grown. It is exceedingly rare as yet. The flowers are produced freely through the summer, and resemble a double white rose, so perfectly are they formed. They are from $2\frac{1}{2}$ to 3 inches in diameter. It is another deserving subject for the hardy perennial garden. 50 cents.

Heuchera Sanguinia Alba.

A white-flowered variety of the very popular *H. sanguinea*. The spikes are pure white and about 18 inches long. It promises to be a popular plant when better known. 25 cents.

Helenium Grandicephalum Striatum.

A most showy and desirable perennial plant. The plant grows 3 to 4 feet high, with flowers $1\frac{1}{2}$ inches across, in branching heads of an intense orange, striped and blotched with crimson. It presents an unique effect in bloom. 20 cents.

HEMEROCALLIS AURANTIACA MAJOR.

Spiræa (Astilbe) Chinensis.

Of recent introduction from China, entirely distinct, and a grand addition to our list of hardy border plants. It is a strong, robust grower, forming a bold clump of large, handsome foliage. The flower stems are erect, about 3 feet high, and support large triangular plumes of feathery white flowers, tinted with pink. 35 cents each; \$3.50 per dozen.

Spiræa Aruncus Kneiffi.

A new variety, superior to all existing kinds. It is of bold, yet graceful habit, attaining a height of 3 to 4 feet, with finely divided, fern-like foliage and a mass of pure white flowers, which are borne in graceful, feathery sprays. A valuable addition to hardy border plants and a most desirable summer cut flower. 50 cents each.

Hardy Aster Grandiflorus.

A splendid form of the popular late-blooming asters, and the finest of all of them. The flowers, about 2 inches across, are of a beautiful violet blue, most effective in autumn, when such flowers are scarce. It is one of the latest to flower, remaining until frost. 25 cents each; \$2.50 per dozen.

Actæa Japonica. (Japan Baneberry.)

A very beautiful variety, blossoming into October, and bearing close spikes of pure white flowers 20 to 30 inches high, which last a long time when cut. An extra good perennial, of great value. 50 cents each; \$5.00 per dozen.

Giant Montbretia "Germania." (See cut.)

The very finest of all this most brilliant summer flowering variety of bulbous plants. It grows 3½ feet high, densely branched with graceful spikes bearing widely expanded flowers 3 inches across, the largest of its class. The color is a glowing scarlet shading to brilliant orange, with blood-red throat and reverse of petals the same color. Nothing can exceed the garden effect of this plant in late summer, when such flowers are invaluable. It is a plant which ought to be well covered each winter with mulching of leaves and straw litter. 25 cents each; \$2.50 per dozen.

GIANT MONTBRETIA "GERMANIA."

New Hardy Giant Primrose.

(*Primula Veris Superba*.)

A hybrid primrose, having somewhat the growth of a polyanthus, combined with the yellow color and fragrance of the English primrose.

In size of flower it is fully three times as large as any hardy primrose known, the average size of the flower being over 1 inch, and we have seen them frequently measuring over 2 inches, with individual trusses of bloom 6 inches in diameter. It is perfectly hardy, grows from 10 to 12 inches high, and

begins to flower earlier and continues in bloom longer than any other plant of the same family known to us. It is not only one of the easiest plants we know of to force, but a plant that will sell on sight when brought into flower during the winter and early spring months. 25 cents each; \$2.50 per dozen.

Clematis Douglasii.

An erect variety from the West, with deep blue flowers in early spring, similar in habit to *C. crispa*, but better in every way. Followed with plummy, decorative seed vessels, and most showy in every aspect. 25 cents each.

NEW HARDY GIANT PRIMROSE.

Incarvillea Delavayi.

A hardy perennial with gloxinia-shaped flowers, rose colored and exceptionally ornamental. It lasts long in bloom, and altogether has few superiors as a hardy decorative plant. The flower spikes are from 18 to 20 inches high. 50 cents each.

Lobelia Rivoirei.

This hardy perennial has received many awards of merit abroad, and is one of the best new plants yet introduced. It has dark bronzy foliage, and grows about 2 feet high, bearing large, striking, bright pink flowers during the summer and autumn months. A splendid introduction. 75 cents each.

NEW HARDY PINKS.

Albino.

One of the finest white hardy pinks yet grown, and with flowers as large as a winter carnation, which are freely produced. Fragrant, and fine for cutting.

Ernest Ladhams.

Exquisite pink shade and deep carmine center. Quite a unique variety and most distinct. Hardy, and free in blooming.

Homer.

Rich rosy red, with dark center. On account of its color and quality most invaluable.

Souv de Sale.

Very similar in shape and size to Her Majesty pink, but of a soft, beautiful pink color. It is a worthy com-

panion to the latter variety, and is entirely hardy. The flowers are of largest size and very double. 15 cents each; \$1.50 per dozen.

Dianthus Plumarius "Snowball."

This magnificent pink originated in Germany, and we offer it for the first time. It is the largest pure white variety yet originated or in cultivation. The stems are very strong, and the flowers do not split or become ragged. It is an exquisite addition to this popular family of hardy plants, and rapidly increases, and becomes a striking feature of any garden of hardy plants. It was awarded a first-class certificate at Amsterdam in 1899. Price, 35 cents.

Ajuga Metallica Crispa.

A most beautiful variety, with dark purplish green leaves, which are curled in an odd form. The habit is close and compact, and the vivid blue flowers appear in dense spikes in the autumn. It promises to be one of the best plants for bedding yet offered. Price, 35 cents.

Geranium Sanguineum Album.

A pure white form of the well-known hardy geranium. It is a most desirable garden plant, with deeply cut ornamental foliage and broad pure white blossoms. It is a true perennial, increasing in size each year. We consider it one of the best of recent new plants. 25 cents each; \$2.50 per dozen.

Trollius "Orange Globe."

The globe flowers are among the most satisfactory of the perennial family. They are constantly in flower through the summer, and are most refined in appearance. This is one of the finest forms, the very large globular flower being a deep orange color. 35 cents each; \$3.50 per dozen.

Arabis Alpina fl. pl.

An extra double form of the rock cress. One of the best early flowering perennials; low growth, suitable either for the rockery or the border, and covered with fine racemes of pure white double flowers.

We recommend it strongly as a most desirable hardy plant.

25 cents each; \$2.50 per dozen.

Yucca Filimentosa Bicolor. (See cut.)

A finely variegated form of the common yucca, or Adams Needle. The evergreen

leaves have a broad stripe of white to the tips, and the flowers, as usual, are produced in tall spikes, with creamy white waxen blooms. A most useful and decorative plant, of value to every garden.

50 cents each; \$5.00 per dozen.

Lupinus Arborea. (Snow Queen.)

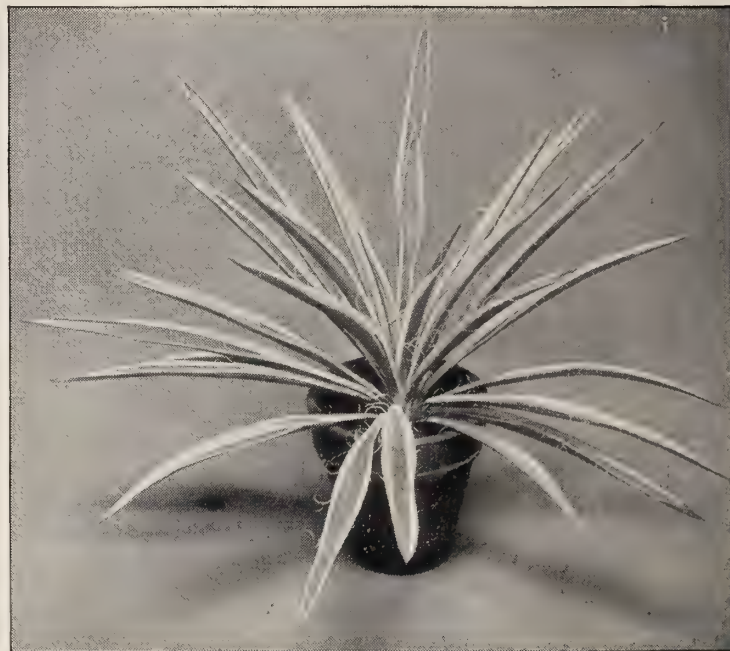

A fine late-blooming variety of the Tree Lupin, with pure white showy flowers on long spikes, produced from July to September. The plant makes a close bush form from 4 to 6 feet tall. In sheltered places this plant will make a grand display in the garden, and, while we consider it an uncertain plant in exposed situations, nothing could be finer when established.

25 cents each;
\$2.50 per dozen.

Polygonum Baldschuanicum.

An excessively rare plant, introduced from Turkestan. Its habit is of twining growth, the long shoots extending upward

into a column of verdure 10 to 12 feet high. Each shoot is terminated by immense panicles of feathery white flowers, the whole forming a mass of bloom quite unlike any other hardy plant known. It blossoms from July to September, and when fully developed may be depended upon to become one of the most striking features of the garden or grounds. \$1.00 each.

YUCCA FILIMENTOSA BICOLOR.

NEW AND RARE LILIES.

New Hybrid Lily Burbank.

Originating in California, its introducer says: "This new lily must be seen in its fullest development to be justly appreciated. The wonderful fragrance is so intense that, with a favorable wind, it can often be detected at a distance of four miles. Taller spikes, more flowers, and larger flowers are produced

each season, single bulbs forming, in the course of a few years, grand immense clumps with 1,500 to 2,000 or more blooms from each clump. Single spikes of flowers are from 1 to 3 feet long and bear from 25 to 150 individual blossoms. Color of flowers yellow with brown spots. Because of its hardiness, vigor, fragrance, and beauty, but especially on account of the rapidity with which it reproduces itself, 'Burbank' is the lily for the million." 50 cents each; \$5.00 per dozen.

Lilium Henryi.

The orange-yellow Speciosum. The ordinary Speciosum lily from Japan is one of the most reliable of all lilies. This splendid yellow form is as good grower as the type, and has received abroad many prizes for its value and beauty. Too much cannot be said in praise of it. It is very free in flowering, as many as 20 flowers being borne on one spike late in the season, these flowers being of a deep orange yellow. It is quite hardy, and grows well in any good, well drained garden loam. \$1.50 each.

Lilium Tigrinum Fortuneii Giganteum.

A wonderful advance upon the famous old tiger lily. The 6-foot spikes producing about 50 flowers each. 50 cents each.

Lilium Rubellum.

When first introduced from Japan, no hardy plant created more interest than this beautiful variety, which has proved quite hardy and vigorous. In point of beauty it

surpasses the chaste and exquisite *L. Krameri*, to which on the first view it would appear somewhat closely related. But in its unique coloring it certainly does surpass this latter kind, and in the richness of the coloring has no rival in the widely famed genus to which it belongs. Happily, too, it is a variable species, as witness the pleasing shades of deep pink or clear or deep rose, as the case may be. \$1.50.

New Hardy Phlox.

The following are the very finest of novelties in this popular flower. All of them are so distinct as to deserve attention.

Fantome.

Entirely distinct, rosy lilac shading to white at edges; a fine large individual flower and truss; very compact and remarkably free flowering. 25 cents each.

F. G. Von Lassburg.

This is the ideal white variety; color pure snowy white, flowers of immense size, measuring 1½ inches in diameter, produced on large, strong, branched panicles. This is simply perfection, and will undoubtedly supersede all others of this color. 25 cents each.

H. Hassack.

Intense orange-scarlet, deep maroon edge; one of the brightest and richest in cultivation. 25 cents each.

Papillon.

A fine flower with large overlapping petals, one-half of same being of a bright lilac suffused with white, the other half being white suffused with lilac. 25 cents each.

BURBANK LILY.

Herbaceous Plants by the Hundred Thousand.

The demand for many varieties of these exceeds the supply. We, however, grow the largest stock in America, devoting some ten acres to their cultivation. Our large catalogue gives a complete list of all the best plants for cultivation. We offer strong plants as low as \$8.00 per hundred for many good varieties, ranging upwards to \$10.00, \$12.00, and \$15.00 per hundred. We make plans for herbaceous gardens and can offer low rates in quantity.

The following are twenty-four of the best herbaceous plants. We offer the entire collection in strong plants for \$2.50.

Asclepias tuberosa,	Hibiscus moscheutos,
Achillea ptarmica,	Lilium longiflorum,
Aster Novæ angliae,	Iris Kämpferi,
Boltonialatisquæmæ,	Pardonanthus sinensis,
Campanula persicæ-	Phlox, tall,
folia,	Pyrethrum uliginos-
Coreopsis lanceolata,	sum,
Dianthus barbatus,	Rudbeckia (Golden
Delphiniums, hybrids,	Glow),
Eulalia gracillima,	Spiræa japonica,
Funkia ovata,	Spiræa palmata,
Gaillardia,	Yucca filamentosa,
Helenium autumnale,	Monarda didyma.
Iris germanica,	

Allegheny Fringed Hollyhocks.

The advent of this new strain of hollyhock is warmly welcomed, the flowers, in many ways, being superior to the old forms. The flowers are from 5 to 6 inches in diameter, the

petals are delicately fringed, and the colors extremely varied, from pink and white to deep red. Robust in growth, spikes 6-7 ft. high.

Superb Double Hollyhocks.

We grow the finest strain of this popular flower, and offer strong plants in white, pink, salmon, yellow, maroon, sulphur, and bright red. 20 cents each; \$2.00 per dozen; \$15.00 per hundred.

Single Hollyhocks.

These old-fashioned flowers are so much in demand that we offer strong plants in mixed colors. 15 cents each; \$1.50 per dozen; \$10.00 per hundred.

New Clematis.

New Hardy Hybrid Clematis Cocci- nea.

An entirely new and distinct type of clematis, the result of crosses between *C. Cocci-nea* and *Star of India*, combining all the good points of their parents in hardiness, vigorous, robust growth, and freedom of bloom, which, together with their novel coloring and shape, make them valuable additions to the list of hardy climbers.

Countess of Onslow. Bright violet purple, with a broad band of scarlet through the center of each petal, of open, bell-shape form, with four to six petals to each flower, which are thick in substance and will be found useful for decorative purposes, and when cut will keep fresh in water for several days.

Duchess of Albany. A beautiful bright pink, deeper down the center, softening to lilac pink round the margin; campanulate in shape.

Duchess of York. A delicate and pleasing shade of pale pink, with a deeper tinge in the center of each petal, of which there are from four to six to each bloom; campanulate form.

Grace Darling. Star-shaped blossoms of a delicate hue of bright rosy crimson; very profuse. Strong plants, \$1.00.

Clematis Madame Andre.

This magnificent carmine red clematis resembles Jackmanni in freedom of bloom and strong growth. The flowers are equally large and similar in shape. A valuable and deserving novelty. 50 cents.

We grow all of the leading and finest of the named large-flowered clematis, like Jackmanni, Jackmanni Superba, Henryi, etc., names of which can be found in our large catalogue. Extra three-year plants, 50 cents each.

Herbaceous Pæonies.

The demand for these gorgeous garden plants is so large that we constantly add to our collection, and can offer the most complete list in the country. In addition to the list in our large catalogue, we have many other fine varieties, like *Festiva maxima*, the finest white grown, and others. There can be no comparison between the fine named sorts and the common cheaper varieties sold. Best named varieties, 50 cents each; \$5.00 per dozen.

Single Pæonies.

These are much sought after, and are very beautiful in flower, many of the blooms being of immense size and gorgeous in effect. Many prefer them to the double varieties. 50 cts. each. See list of names in large catalogue.

New Japan Tree Pæonies.

We import from Japan these plants, which in their own country occupy a *premier* position. The size and colors of these pæonies are surprising, many of the flowers measuring 12 inches across.

They are hardy, vigorous plants. We have them in many colors, like pink, scarlet, crimson, white, rose, and purple. 75 cents each; \$8.00 per dozen.

SUMMER FLOWERING BULBS.**Show and Fancy Dahlias.****New Varieties.**

Prince Henry. Rich deep lilac, striped with purple; very large, of good form, and a free bloomer. One of the finest. Price, 50 cents.

White Swan. Pearly white. The finest white show for cutting. It blooms very freely; every flower perfect, with stems very long. Awarded first prize by American Institute. 30 cents.

General Collection.

Price, 12 cents each; \$1.25 per dozen, except where noted.

Alice Emily. Buff yellow, of perfect form. Grand exhibition flower. 3 ft., 20 cents.

A. D. Livoni. Pure pink. The best pink dahlia grown.

Apple Blossom. Creamy white, tipped crimson.

Arabella. Pale primrose, tipped and shaded delicate rose.

Dr. J. P. Kirtland. One of the largest dahlias grown. Height about 6 ft., throwing the dark velvety crimson flowers well above the foliage.

Golden Age. Sulphur-yellow; the purest shade in this color. The petals are slightly notched, giving the flower a very pretty appearance.

Goldspere. Beautiful crimson, distinctly tipped gold.

Keystone. Pinkish lilac, striped crimson. Very large and an extra free bloomer.

Maid of Athens. Crimson maroon, medium size. One of the best garden varieties in the entire list.

Modesty. Creamy white, shading gradually to light pink.

Mrs. J. Downie. Light orange, striped with scarlet. Flowers very large and full. 30 cents.

Madge Wildfire. Fiery red; large, perfect form, and very free.

Rev. J. B. McCamm. Yellow flaked crimson. One of the richest varieties. A free bloomer, with flowers of good size and form. 4 ft., 15 cents.

Pompon Dahlias.**New Varieties.**

Alewine. A very delicate shade of pink, slightly tinted lilac. The form is all that could be desired; stems very long and blooming qualities excellent. Superb. 20 cents.

General Collection.

Price, 12 cents each; \$1.25 per dozen, except where noted.

Burning Coal. Yellow, edged crimson. 15 cents.

Catherine. Bright yellow.

Eleganta. Pink, finely quilled.

E. F. Junker. Rich amber.

Fernleaf of Beauty. Small creamy white flowers, with a margin of crimson around each petal; foliage fern-like. Fine bedding variety.

Guiding Star. Pure white, petals very prettily notched. 3 ft.

Lillian. Clear, soft primrose, tipped peach. A beautiful combination of shades. 25 cents.

Little Bessie. Creamy white, finely quilled. Extra free bloomer.

Little Hercules. Dark red, splendid form, and beautifully shaded.

Phoebe. Rich orange, tipped red. A perfectly formed flower and an early and continuous bloomer.

Prince Charming. Crimson pink.

Sunbeam. A new crimson pompon that is a distinct advance in form and free blooming qualities. 15 cents.

Vivid. Crimson scarlet. Fine.

Decorative Dahlias.

New Varieties.

Perle de la Tete D'Or. One of the most remarkable and most beautiful of all the decorative class. Flowers a pure white with frequently a slight tinge of purple; very large and of exquisite form, with petals very prettily notched. Its chief value, however, lies in its adaptability for cutting and deco-

orative purposes. The stems are erect and very long, often 2 ft. or more, while the blooms will keep for days longer than other varieties. 75 cents.

General Collection.

12 cents each; \$1.25 per dozen, except where noted.

Amphion. Chrome yellow, tipped cerise.

Bronze Cactus. Reddish bronze.

Constancy. Dark amber, large and very free.

Grand Duke Alexis. A pure glistening white, the tips tints soft lilac. Very large and elegant form. First prize at Boston for best bloom, any class. 25 cents.

Honorina. Soft, pale amber.

Josephine. A beautiful shade of crimson. Fine for cutting.

Lady Montague. Rich salmon, shaded cerise.

Mayor Haskins. Glowing crimson.

Nymphæa. Shrimp pink. A splendid variety.

Oban. Salmon, overlaid crimson pink.

Sunlight. Yellow. Very large.

Zulu. Darkest maroon.

Cactus Dahlias.

New Varieties.

Mrs. Bennett. Soft crimson, of splendid form; a very early, free, and continuous

bloomer, with flowers well above the foliage. Valuable for cutting. Price, 50 cents.

General Collection.

Blanche Keith. Pure yellow, very large and free. 15 cents.

Cyclops. Crimson, richly shaded.

Delicata. Light salmon, shading to pink; a beautiful flower. 15 cents.

Ernest Glasse. Purple magenta, perfect cactus form, very free. The best of this color. 30 cents.

Gloriosa. Scarlet, large, finely formed flowers. 15 cents.

Harmony. Reddish bronze, petals long, curled, and well pointed. 30 cents.

John Roach. Soft yellow, long petals well curled. A very free bloomer. Good stems. 30 cents.

Lady Penzance. Clear sulphur-yellow. A very fine variety. 15 cents.

Matchless. Rich velvety maroon, perfect form, good stems. 30 cents.

Mrs. Thornton. Salmon pink.

Mrs. A. Peart. Creamy white. An elegant variety. 15 cents.

Prof. Baldwin. Bright orange. Very free. 20 cents.

Tuberous Begonias.

For bedding and pot culture nothing can excel these begonias. The flowers measure from 3 to 5 inches across, on strong, upright stems, and the colors run from pure white and delicate pink, orange and yellow, to the most intense shades of scarlet and crimson. Their culture is simple. They prefer moisture in summer and a partly shaded location. Given good soil and partial shade and moisture, they amply repay any effort made to grow them. Full cultural directions will be sent on request.

SINGLE SORTS.

Scarlet.	Pink.
Orange.	White.
Crimson.	Yellow.

10 cents each; \$1.00 per dozen; \$6.00 per hundred.

SINGLE, ALL COLORS MIXED.

8 cents each; 75 cents per dozen; \$5.00 per hundred.

DOUBLE SORTS.

Scarlet.	White.
Pink.	Yellow.

20 cents each; \$2.00 per dozen.

DOUBLE, ALL COLORS MIXED.

15 cents each; \$1.50 per dozen.

NEW FRENCH CANNAS.

The following list embraces the very best out of the hundreds of new hybrids. Growers find it most bewildering to choose the best, but these we offer may be depended upon for the most brilliant and satisfactory results, the various points of growth, flowering qualities, and fine blooms being fully considered in making up the list.

Alemania.

This canna of the Italian type bears extraordinary flowers over 6½ inches across. Upper petals salmon, broadly bordered with golden yellow, the lower petals darker salmon and marked with yellow. Massive green leaves, 6 feet in height.

Alphonse Bouvier.

An older variety, but still at the head of tall crimson varieties. A strong grower with bright green foliage. Very floriferous; grows 6 to 7 feet high.

Alsace.

The nearest approach to a white canna yet introduced; flowers of medium size, and on opening are of a pale sulphur-yellow, changing to creamy white; it is a strong, free grower, and very free flowering; planted in conjunction with the high-colored sorts, it makes a fine contrast. 4½ feet.

Egandale.

A most excellent variety, with bronzy foliage and soft, currant-red flowers, which are thrown well above the foliage; the best of its type; attains a height of about 4 feet.

Florence Vaughan.

Undoubtedly one of the finest yellow-spotted varieties yet sent out. In color it is of a bright rich golden yellow, spotted with red; the flowers, which are of the largest size, of great substance, and of perfect form, are borne in large heads and in the greatest profusion; the foliage is massive and of a rich green color.

J. D. Eisele.

Flowers vivid vermilion scarlet overlaid with orange. A strong, free grower. One of the best of its color.

Queen Charlotte.

A splendid gilt-edged variety, and by many considered the finest of the class. The flowers, which are very large, with broad, rounded petals slightly recurved, are borne in immense heads, well above the foliage, and are most striking in color; a bright orange-scarlet, deeply edged with bright canary-yellow. The plant is of dwarf habit.

Souvenir Antoine Crozy.

A magnificent gilt-edged variety. The flowers are very large, with well-rounded petals, which are of the most intense scarlet crimson, bordered with a broad band of rich golden yellow; trusses very large and erect, carrying an immense number of large flowers. Nearly every flower stalk branches, producing two perfect spikes. Very free bloomer.

Sam Trelease.

The special merit of this variety is that the flowers open out flat, making an almost circular

flower. It is the nearest approach to pure scarlet among cannas. No other variety compares with it in freedom of flowering. It is sure to become a standard sort.

Austria.

Remarkable for its sturdy, rank growth, forming massive clumps 6 to 7 feet high, covered from the ground up with large, deep green Musa-like foliage. Plants set out early in the season will, before midsummer, form clumps with 20 to 30 strong stems, each stem surmounted by tall spikes of golden yellow flowers, standing upright like immense lilies. It blooms continuously.

Madame Crozy.

The flowers of this well-known and popular variety are of a bright crimson scarlet, bordered with golden yellow. The plant is of vigorous growth, yet dwarf in habit. Foliage bright green and massive. The large branching stems are closely set with bloom, each stem being really a bouquet in itself.

President McKinley.

Color brilliant crimson, with bright scarlet shading. Truss large, compact, of good shape, and held well above the foliage, and are produced freely and evenly. Plant is dwarf, 3 feet; foliage deep green, with marked chocolate margin. It is one of the earliest bloomers, coming into flower when 14 to 18 inches high, and blooming continuously thereafter. The effect when massed is extremely brilliant. A marked improvement upon all crimson cannas introduced to date; undoubtedly the best of crimson bedders.

Any of the above, 15 cents; \$1.50 per dozen.

Gladiolus.

There is no more attractive and valuable summer-flowering bulb than the gladioli. We can offer a splendid variety of these at low prices. The mixtures are especially desirable for general planting and can be well recommended. All are selected first-class bulbs, and give the best results, as the colors are carefully blended.

Scarlet and crimson shades, 25 cents per dozen; \$1.50 per hundred.

White and light shades, 35 cents per dozen; \$2.50 per hundred.

Yellow shades, 50 cents per dozen; \$3.50 per hundred.

Pink shades, 35 cents per dozen; \$2.50 per hundred.

Extra mixed, all shades, 30 cents per dozen; \$2.00 per hundred.

Lemoine's Hybrids. (Nanceanus.)

These brilliant spotted flowers are very broad and showy, and quite distinct from any others. They are vigorous and effective, being twice the size of ordinary gladioli. 8 cents each; 75 cents per dozen.

Gloxinias.

We can offer the best type of this beautiful flower in mixed varieties, embracing all colors. 15 cents each; \$1.50 per dozen.

Caladium Esculentum.

(Elephant's Ear.)

One of the most effective plants in cultivation for the flower border or for planting out upon the lawn. It bears immense leaves 3 to 4 feet long by 2½ feet wide. First size

bulbs, 20 cents each; \$2.00 per dozen. Second size bulbs, 15 cents each; \$1.50 per dozen.

Milla Biflora.

(Mexican "Star of Bethlehem.")

One of the the most desirable bulbs. The flowers are nearly 2½ inches in diameter, of a pure waxy white color. Bulbs, 5 cents each; 50 cents per dozen.

Montbretias.

The Montbretias are one of the most brilliant of summer-flowering bulbs, and will never be dispensed with when once grown. They are hardy and rapidly multiply.

Crocsmiaeflora. Deep golden orange; fine.

Etoile de Feu. Bright vermilion, yellow center.

Gerbe d'Or. Splendid golden yellow.

Pottsii grandiflora. Golden orange, outside bright red.

Rayon d'Or. Yellow and brown.

Transcendent. Orange and vermilion; large.

Any of the above, 5 cents each; 30 cents per dozen; \$2.25 per hundred.

Tigridias. (Tiger or Shell Flower.)

These showy summer-flowering bulbs flower freely throughout the summer, and require the same treatment as gladioli.

Conchiflora. Golden yellow, spotted crimson.

Pavonia grandiflora. Bright crimson, center spotted with yellow.

Grandiflora alba. Ivory white, yellow center, spotted with crimson.

5 cents each; 40 cents per dozen.

Tuberoses.

Excelsior Double Pearl. Three for 10 cents; 25 cents per dozen; \$1.50 per hundred.

Zephyranthes.

(Zephyr Flowers, or Fairy Lilies.)

Beautiful dwarf bulbous plants, very effective for planting out in masses in May.

Alba. Pure white. 5 cents each; 40 cents per dozen; \$3.00 per hundred.

Rosea. Large rose-colored flowers. 5 cents each; 40 cents per dozen; \$3.00 per hundred.

Iris Kämpferii. (Japan Iris.)

We grow this splendid iris by the acre, and can supply in any quantity. We import from Japan every new variety found; consequently, our collection is complete, both as to old and newer sorts. See list in large catalogue and cultural directions.

Named kinds, per dozen, \$2.50; per hundred, \$18.00.

Fine seedlings of choicest kinds, \$1.25 per dozen; \$8.00 per hundred.

Hardy Ornamental Grasses.

These are invaluable in any position, grouped in the garden with other plants or as single specimens.

The Arundos and Eulalias add largely to effectiveness in combination with flowering plants.

Arundo Donax (*Great Reed*). A magnificent variety, growing to a height of 15 feet, and forming dense clumps. 25 cents each.

— **Variegata.** A beautiful variegated form of the above. Foliage creamy white and green; growing 6 to 8 feet high. 25 cents each.

— **Macrophylla Glauca.** A remarkably strong-growing variety, attaining a height of 15 feet, with foliage $3\frac{1}{2}$ to 4 inches wide, much closer jointed than the type; the leaves are of a dark glossy green on the upper surface and of a glaucous color underneath. It forms denser and more majestic-looking plants than *A. donax*. 50 cents each.

Elymus Glaucus (*Blue Lyme Grass*). A handsome grass, with narrow glaucous silvery foliage; well adapted for planting in the border. 15 cents each; \$1.50 per dozen.

Erianthus Ravennæ. Grows from 9 to 12 feet high, frequently throwing up from 30 to 50 flower spikes. It closely resembles the Pampas Grass. 25 cents each.

Eulalia Gracillima Univittata. Of compact habit, with very narrow foliage; of a bright green color, with a silvery midrib. 25 cents each; \$2.50 per dozen.

— **Japonica Variegata.** A very graceful variety from Japan. Its long, narrow leaves are striped green, white, and often pink or yellow. It throws up flower stalks from 4 to 6 feet in height; very ornamental. 25 cents each; \$2.50 per dozen.

— **Zebrina** (*Zebra Grass*). The long blades of this variety are marked with broad

yellow bands across the leaf. 25 cents each; \$2.50 per dozen.

Festuca Glauca. A pretty, tufted grass, with glaucous foliage. 15 cents each; \$1.50 per dozen.

Gynerium Argenteum (*Pampas Grass*). One of the most effective. Its silvery plumes are produced on stems 8 to 10 feet high. Well-established plants can remain in the open ground if protected. 25 cents to 50 cents each.

Phalaris Arundinacea Variegata (*Variegated Ribbon Grass, or Gardener's Garters*). Large, variegated foliage; an excellent grass for bordering large beds. 10 cents each; \$1.00 per dozen; \$6.00 per hundred.

Uniola Latifolia (*Spike Grass*). One of the best of our native grasses, growing from 3 to 4 feet high, with large, flat flower heads in graceful, drooping panicles. 15 cents each; \$1.50 per dozen.

FRUIT TREES.

Fruits and Small Grapes.

Currants, Blackberries,

Raspberries, Gooseberries,

Strawberries.

We grow these largely, and can make very special prices to buyers.

Our large Catalogue gives in detail all of the leading new and old varieties of **Apples, Cherries, Pears, Plums, Peaches, Apricots**, etc., of which we offer the finest quality grown, in first-class, healthy trees. We can supply these in any quantity, singly or by the hundred or thousand. Write for special estimates.

	Each.	Per doz.
Apples	\$0.30	\$3.00
Pears35	3.00
Plums35	3.00
Cherries50	5.00
Peaches25	2.00

Box Trees.

In Standards and Pyramids.

These evergreen plants are most useful and ornamental for garden decoration or for use in tubs in positions where their formal outlines are most appreciated. They are quite hardy when planted out, and their dark green, dense foliage is attractive either in summer or winter.

Fine plants, closely sheared, from 3 to 4 feet tall, \$2.50 each.

New Double and Single Lilacs.

We can supply the finest collection of these deservedly popular shrubs in almost every variety worth growing. Our large catalogue contains a full list of the most distinct species and hybrid forms. There are many kinds,

the flowers of which are similar, but the following list embraces only those which are notably valuable in habit of growth and flowering qualities: Josikæa, Ludwig Spæth, Marie LeGraye, Chas. X., Frau Dammann,

Philemon, Alphonse Lavallæ, Leon Simon, Max Cornu, President Carnot, Mad Lemoine, Virginite, M. Dombasle.

Strong bushes from 50 to 75 cents each.

Wood Ashes for Lawns.

The value of pure ashes for enriching lawns is far beyond stable manure, besides being much more economical. The value of a barrel of ashes applied in the spring is about equal to a cord of manure. By the use of ashes weeds are eliminated, and a rich, lasting verdure secured. Per barrel, \$2.00.

Summer Bedding Plants.

We would direct attention to our facilities for furnishing tender summer-flowering plants of the highest quality. All of the following plants are sturdy and well grown, and can be depended upon for quick effect in summer. In consideration of the quality, our prices are low.

Landscape Gardening and Design.

THIS is the most important department of our business. We maintain a force of experts, who, from long and varied experience, are competent to develop either large or small estates with economy and in harmony with the best ideas of landscape art.

We undertake such work without unreasonable charges, and can save our clients a large margin of the usual cost.

We ask every owner of new grounds to appreciate the fact that skilled advice in the treatment of his property is as imperative as in the building of the house, especially when it is considered that the ultimate effect of a large proportion of the best residences depends to a large extent upon the proper treatment of the surrounding grounds. It is well to remember that fully fifty per cent. of the cost of the better class of houses is expended with the desire of producing beauty, and that one dollar intelligently spent on the grounds will afford more beauty than ten will on the house.

One has but to note the pleasing and refined aspect of a dwelling with carefully studied plantings of tree and shrub growth, harmoniously grouped and arranged, with paths and roads in graceful outline, and charming vistas and landscape effects fully emphasized, to appreciate how important it is to consider this work in the broadest way and to entrust it to skilful hands and trained judgment. We are prepared to make full plans, locate residences and roads, estimate on grading, remodel old estates, and in all departments of landscape design and engineering to secure efficient and economical results.

In the near neighborhood of Boston we send expert men at any time to advise on planting, etc., without charge.

SHADY HILL NURSERY CO.,

102 State Street, Boston, Mass.

The photograph above shows what was, under judicious landscape treatment, changed from a rocky pasture into one of the most beautiful estates on the North Shore. We can refer to hundreds of such private places developed and planted by us.
